(Pass is 70%)

SEPTEMBER 13, 2016 EARLY ORTHODONTIC TREATMENT

- | | | | |
|----|---|---|---|
| 1. | If there is no room for permanent lateral incisors you must expand the arch. | T | F |
| 2. | The best solution for an anterior open bite caused by an anterior tongue thrust would be a fixed expander with a tongue crib. | T | F |
| 3. | The Rick-A-Nator is an ideal appliance to correct a deep overbite. | T | F |
| 4. | Most skeletal Class II malocclusions have a prognathic maxilla and need extractions. | T | F |
| 5. | For patients with deep overbites, composite buildups on lower primary molars are often a good treatment plan. | T | F |

TO RECEIVE 1 HOUR OF CONTINUING EDUCATION, PLEASE COMPLETE THE TEST AND FAX TO 1-519-455-1589 OR SCAN AND EMAIL TO LEE@RONDEAUSEMINARS.COM.
