HANDS ON

27 & 28th
MARCH 2026 🇺🇸

Monterey Bay, California

📍 Monterey Conference Center
1 Portola Plaza, Monterey, CA 93940, United States

Speaker:

Dra. Daniela Storino 🇧🇷

- Founder of StorinoAcademy
- Specialist in Pediatric Dentistry
- Specialist in Orthodontics and Dentofacial Orthopedics
- Specialist in Functional Orthopedics

$2,395 Early bird special registration until March 23rd, regular fee of $2,595, after.

BIOPHYSIOLOGIC ORTHODONTICS
DR. DANIELA STORINO

The course introduces a new concept of orthodontic diagnosis, planning and treatment, breaking paradigms and allowing the orthodontist to understand how the skull grows and malocclusions develop; its morphological characteristics, its very close relationship with posture and the balance system, enabling the comprehensive treatment of our patients in borderline orthodontic cases (Cl II, Cl III, Cl I with severe crowding, MLD facial asymmetry, open bites), without orthognathic surgery or palatal disjunction), and also the redirection of growth in children.

DAY 1

Topic 1: What is biophysiological orthodontics

- Bone biology, the secrets of passive self-ligating, MOPs, and more.
- What is posterior discrepancy, and how to manage it.
- Identification and management of occlusal planes (anterior & posterior)
- Passive eruption vs. active eruption vs. extrusion.
- Differences between the conventional system and the biophysiological system.
- Can I get the same result with any prescription bracket?

Topic 2: My Mechanics

- Arch development: when, why, and how to accomplish it.
- Vertical dimension as the key to adequate correction of Class 2, Class 3, and MLD cases.
- Shimbashi: individualized vertical dimension
- Working wires, transition wires, and finishing wires.
- GUMMETAL wires (GEAW, MEAW, MOAW, Mulligan's Overlay Arch).
- Conventional elastics vs. optimized elastics (how to use the adverse effect to our advantage)
- Why Early Short Light Elastics
- Control and management of occlusal planes

FIVE STAR
ORTHODONTIC
LABORATORY & SUPPLY

Topic 3 Spheres of Function - Curves of Compensation

- Geometry of Occlusion - Prof. Slavicek

- How the TMJ really works and why TMJ first, and then BPO

- The importance of the vertical dimension of occlusion (VDO)

- The art of disarticulation, reasons for disarticulation

- How to avoid joint compression (compression = condylar resorption = dysfunction)

- How to close an open bite without generating joint compression

- Identify the difference between when it is a Full arch intrusion or an intrusion only for the anterior tooth

- Full arch intrusion, correction of gummy smiles - Storino Protocol

Topic 4: What do I need to change in my patient?

- The true etiology of malocclusions
- Correct diagnosis of malocclusions
- The importance of functional occlusion
- Where to look in the cephalometry
- Bracket position - differential bonding?
- M.A.D.S - Maxillary Arch Development System
- Step-by-step treatment of low- and high-angle Class II
- Step-by-step treatment of low- and high-angle Class III
- Complex cases
- Finishing our cases
- Good occlusion function (sequential guide to canine-dominant disclusion - Prof. Slavicek)

Hands On:

- Shimbashi: individualized vertical dimension
- Mulligan's Overlay Arch
- Tip back bend to intrude/extrude posterior teeth
- Wire bending to correct occlusal cants and posterior occlusal planes in anterior open bites, Class II & III cases, through active eruption and control of the ideal individualized vertical dimension of the patient.

Here are some recommendations to help you plan your stay. The event will be at the Monterey Conference Center, from 8 am to 5 pm. The hotel next to it is the Portola Hotel. However, if you would like to stay at the hotels by the ocean/bay, they are 5 minutes away by Uber/Lyft or a 25-minute walk to/from the conference center. Some of the hotels offer breakfast. The event will include a light breakfast, coffee breaks, lunch, snacks, both days, and dinner on the first night. I recommend the Monterey Airport (MRY), 10 minutes from the hotels and conference center. You can also fly into SJC airport, which is 1hr20min, and/or SFO, which is about 2 hrs.

Here are the links:
https://www.montereyconferencecenter.com/

*Hotels 4 stars, some offer breakfast to add or included at booking: Portola Hotel, next to the conference center, with harbor view recommended https://www.portolahotel.com/?utm_source=google&utm_medium=organic&utm_campaign=gbp_listing

For the hotels below, I will look into the rooms with ocean or harbor view:
https://www.ihg.com/intercontinental/hotels/us/en/monterey/mryha/hoteldetail?cm_mmc=GoogleMaps-_-I C-_-US-_-MRYHA
